TRUMPANDA

WHITEPAPER V1.0

Two Pandas. One Golden Coin. One Global Community.

TOKEN	$TRUMPANDA	NETWORK	BNB Chain
SUPPLY	1,000,000,000	LAUNCH	Four.Meme

TRUMPANDA is a community-driven meme project on BNB Chain inspired by the real-world story of two giant pandas, Ping Ping and Fu Shuang, and the growing global attention around their new chapter in Atlanta.

Reality first. Community second. The meme grows with the story.

01. Project Overview

TRUMPANDA is a community-driven meme project built on BNB Chain and launched through Four.Meme. The project is designed around a simple idea: the real-world story comes first, and the on-chain community grows alongside it.

Rather than inventing a fictional character and then trying to build a narrative around it, TRUMPANDA follows a story that is already unfolding in the real world: two giant pandas from Chengdu, China, beginning a new chapter in Atlanta.

02. The Real-World Panda Story

Ping Ping is a male giant panda born on March 17, 2020, at the Chengdu Research Base of Giant Panda Breeding in China.

Fu Shuang is a female giant panda born on October 18, 2020, at the Chengdu Research Base of Giant Panda Breeding in China.

Both pandas arrived in Atlanta on September 27, 2026. Their arrival creates an evolving real-world narrative: adaptation to a new environment, future public appearances, photographs, videos, media coverage, visitor interest, cultural discussion, and community-created content.

TRUMPANDA does not claim ownership of this real-world story. The project follows public developments and transforms the attention, emotion, humor, and cultural conversation surrounding the pandas into a Web3 community narrative.

03. Vision & Identity

TRUMPANDA is not a DeFi protocol, Layer 1, Layer 2, or yield product. It is a meme and community project whose identity is built around four elements: a real story, meme culture, global community, and on-chain transparency.

Real Story: a continuing public story involving two real giant pandas and their life in Atlanta.

Meme Culture: internet-native humor, visual storytelling, memes, short-form content and community creativity.

Global Community: a simple cultural symbol - the panda - that can be understood across languages and borders.

On-Chain Transparency: a public BNB Chain token contract that anyone can independently verify on-chain.

04. Token Information

Token Name	Golden Trumpanda Coin
Ticker	$TRUMPANDA

Network	BNB Chain
Total Supply	1,000,000,000 TRUMPANDA
Launch Platform	Four.Meme
Contract Address	0x9cc47b3496280eae42fda8d13c98e2a5b17dd0b8

Always verify the contract address through official TRUMPANDA channels. Never rely on a contract address sent only through an unsolicited private message.

05. How to Buy

At the current stage, TRUMPANDA is traded through the Four.Meme bonding curve.

1. Open the official Four.Meme platform.

2. Search the official contract address shown below.

3. Open the official $TRUMPANDA page and confirm the token name and contract address.

4. Connect a BNB Chain compatible wallet.

5. Review the transaction and buy through the bonding curve.

`CA: 0x9cc47b3496280eae42fda8d13c98e2a5b17dd0b8`

06. Community Strategy

TRUMPANDA prioritizes real participation over inflated statistics. The project measures community health through real members, real conversation, original content, genuine engagement, and long-term retention.

Real Members: growth should come from people who actually understand or engage with the project.

Real Engagement: conversation, replies, original posts, memes, videos, community ideas and organic sharing matter more than vanity metrics.

Global Reach: the project intends to grow across English, Chinese, Thai, Korean, Vietnamese and additional communities over time.

Creator Network: community creators, meme accounts, Web3 communities, X Spaces, AMAs and relevant partnerships form the long-term outreach layer.

07. Roadmap

PHASE 1 - Foundation

Launch the token, establish the website and official channels, publish the contract address, define community rules, build the visual identity, and grow the first base of genuine community members.

PHASE 2 - Visibility

Expand awareness across X, Telegram, BNB Chain communities, meme communities, crypto directories, token discovery platforms, creators, media contacts, AMAs and community partnerships.

PHASE 3 - Panda Story

Follow publicly verifiable developments involving Ping Ping and Fu Shuang in Atlanta and use meaningful milestones as new storytelling moments for the community.

PHASE 4 - Global Community

Scale from the initial community toward larger milestones while focusing on authentic participation, multilingual content, original community contributions and holder/community retention.

PHASE 5 - Ecosystem Expansion

Evaluate additional community partnerships, Web3 platforms, creator networks, regional communities, data platforms, cultural activations and potential exchange opportunities when appropriate.

Important: Roadmap items describe development goals, not guaranteed outcomes, prices, listings, returns or timelines.

08. Content & Fact Principles

TRUMPANDA separates meme creativity from factual project communication.

Already happened: describe it as a fact only when it can be reasonably verified.

Not yet happened: describe it as planned, expected, upcoming or possible - never as a completed fact.

Cannot be verified: do not publish it as an official project fact.

Meme content: humor and creativity are welcome, but should not be presented as official real-world claims.

09. Independence Statement

TRUMPANDA is an independent Web3 community meme project. It is not an official project of, affiliated with, sponsored by, or endorsed by any government, political figure, Zoo Atlanta, the Chengdu Research Base of Giant Panda Breeding, any conservation organization, any zoo, BNB Chain, Four.Meme, or any other organization mentioned in project storytelling unless that organization explicitly states otherwise.

References to public figures, locations, giant pandas, news events or organizations are used only to describe the cultural context and public narrative followed by the community.

10. Risk Disclosure

$TRUMPANDA is a meme token and digital asset. Digital assets can be highly volatile. Prices may rise or fall quickly, liquidity can change, and purchasers may lose part or all of the funds they use to acquire the token.

TRUMPANDA does not guarantee investment returns, token price, future market capitalization, exchange listings, liquidity, demand, community size or any commercial outcome.

Users are responsible for understanding smart-contract risk, wallet security, private-key security, market risk, liquidity risk, meme-token risk and any laws or regulations applicable in their jurisdiction.

Never share a seed phrase or private key with anyone claiming to represent TRUMPANDA.
